

Workshop
The Collage Lab

EASY READ

Artist Susanne Dietz will be leading a workshop on making knowledge together. Dietz worked with scientist Prof Anne-Marie Minihane and scholar Dr Silvia Casini.

The event takes place on 16 February.

It runs from 2pm to 4:30pm.

This event is free but you need to sign up. Click the booking button on the website to sign up.

About the workshop

Susanne Dietz's project explores menopause and dementia. She has been curious about how we artists and scientists can work together.

In this workshop, participants will make collage. Collage is made by cutting and pasting different images. And they will use this process to understand scientific information.

The first part of the workshop will be introductions by the speakers.

The second part of the workshop will be a collage making session.

Images and texts that you will be cutting are part of the artists' research.

Who can join?

Anyone can join the workshop.

You don't need to have an artistic background. You don't need to have scientific knowledge.

You will need to participate in collage making. You will need to share your thoughts.

About the artists

Silvia Casini teaches Film and Visual Culture at the University of Aberdeen. Her work discusses visual culture, cinema, science and technology. She has published her writing in many international journals.

Susanne Dietz is an artist. She works with video. Her videos include collage, sound and performance. Her work explores reality, memory, and the body. She has shown her work in many galleries across the UK.

Anne-Marie Minihane teaches Nutrition and Genetics at the Norwich Medical School. She is the director of Norwich Institute of Healthy Ageing (NIHA). This agency works on preventing health and disease. Their research investigates how omega-3 fatty acids affects our bodies.

Access Information:

- If you need support to join the event, please reach out to us at 020 31412960 or email events@lux.org.uk
- We are on a hill near the Archway Station. The hill is steep. You can take a bus from the station to the top of the hill.
- You can bring your assistance dogs
- There are accessible toilets and route for wheelchair users
- Please read more about our general access information on our website
